

BRILLIANT POCKET WATCH PENDANT

jacobandco.com

From the show-stopping brilliance of the 269 gemstones that adorn its case, crown and buckle, to the captivating intricacy of its open-work skeleton movement, the Brilliant Skeleton Baguette is a fusion of time and light – a masterpiece that combines the classic art of the skeleton watch with the jeweler’s skill of meticulous, invisible gem setting with no visible gold between each stone.

Seemingly suspended in space thanks to the ingenious incorporation of a distinctive balance bridge, the hand-wound caliber’s balance at 6 o’clock brings an additional spectacle of transparency.
