

WW1 RÉGULATEUR - Pink gold

Technical Notes

GENERAL DESCRIPTION

Mechanical **movement** with automatic winding. 25 jewels. 28,800 beats per hour. Power reserve of about 40 hours. High-precision adjustment in 4 positions (tolerance of 0/+10 seconds per day). **Functions:** hours (A), minutes (B) and seconds (C). Setting the time with seconds. **Case:** diameter: 42 mm. Thickness: 12 mm. Polished 18 ct pink gold. "Barleycorn" guilloché caseback. **Dial:** opaline silvered. Blue-steel hands. Domed sapphire **crystal** with anti-reflective coating. **Water resistance:** 30 meters. **Strap:** alligator.

GENERAL USAGE

Winding. *When the watch has stopped* (crown in position 0): wind the mechanism by turning the crown (D) clockwise. After about 40 rotations, the watch is fully wound (the mechanism has no stop in order to keep the winder from being wound too tightly). The operating time is then about 40 hours. *When the watch is being worn*, winding takes place automatically. **Setting the time.** Pull out the crown to position 1. The second hand is then stopped, which lets you set the time down to the second. Set the time by turning the crown in the desired direction.

- A. Hour hand
- B. Minute hand
- C. Second hand
- D. Crown

- 0. Wind the mechanism manually (clockwise)
- 1. Set the time (either clockwise or counterclockwise)

IMPORTANT

The crown must never be handled underwater.

CARE

After being immersed in seawater, it is recommended to always rinse off the watch and its strap with fresh water. We also recommend that you check that your watch is still watertight every two years. In order to guarantee service compliant with the brand's requirements, any servicing on your watch must be carried out by one Bell & Ross repair center or by a watchmaker approved by Bell & Ross. For any repairs under warranty, you will need to present the Bell & Ross warranty card, duly dated and signed by the retailer at the time of purchase.

The Bell & Ross international guarantee

Your Bell & Ross watch has successfully passed the most rigorous reliability tests in the Swiss watch-making industry. It is guaranteed against all manufacturing defects for 2 years from the date of purchase entered by the Bell & Ross approved retailer on the international guarantee certificate subject to applicable laws and/or legal guarantees. This guarantee is total (parts and labor). It excludes however:

- . Damage that is the result of accidents or improper or incorrect use of the watch (violent shock, crushing, brutal handling of the clasp).
- . Damage that is the result of repairs or dismantling not carried out by an approved Bell & Ross retailer or an approved after-sales service center.
- . The results of normal use and wear of the watch and strap. This also excludes batteries given the specific nature of these items.

IMPORTANT : To be covered by the Bell & Ross International Guarantee, any work must be carried out by approved specialists : retailers approved by Bell & Ross, approved after-sales service centers. This guarantee can only be applied on presentation of the Bell & Ross International Guarantee certificate, duly completed, dated and signed by an approved retailer.
